

React + Vite

This template provides a minimal setup to get React working in Vite with HMR and some ESLint rules.

Currently, two official plugins are available:

- [@vitejs/plugin-react](#) uses [Babel](#) for Fast Refresh
- [@vitejs/plugin-react-swc](#) uses [SWC](#) for Fast Refresh

Start server

- Start dev server: `npm run dev`
- Start node express server `start`: `"node server.js"`

express install

```
npm install express cors multer
```
